Imagine the possibilities...

Every day, Keystone Hardscapes helps turn possibilities into realities: an intimate backyard gathering space to entertain family and friends... a plaza with a unique, stylish ambiance... a stunning driveway and walkways to make that great first impression...

Keystone Hardscapes is where beauty, versatility and function meet. Since the 1980s, our products have been installed in thousands of residential and commercial properties. Our innovative pavers, walls and outdoor living elements continue to be favorites of homeowners, contractors, designers and developers.

Locally made products, nationally trusted brand. Trust us to help bring your next project to life.

ACCESSORIES

Natural Look Sealer – Water-based penetrating silicone sealer waterproofs and protects concrete, brick, masonry, pavers, and stucco surfaces. Clear sealer does not change the surface appearance. Seals from water, salts, and oils. UV Resistant.

Use For: Driveways • Patios • Walls • Sidewalks • Pre-stress panels • Retaining walls • Tunnels • Loading docks • Bridge columns • Tunnels • Curbs/steps

Wet Look High Gloss Sealer – Water-based penetrating silicone sealer waterproofs and enhances the color of concrete, masonry, brick, paver, and natural stone surfaces. Seals from acids, grease, food stains, oil, salt, and more. UV resistant.

Use For: Decorative concrete • Pavers • Natural stone • Exposed aggregate • Brick • Stucco

Commercial Grade Polyurethane Construction Adhesive – High performance, commercial grade adhesive designed for permanently bonding concrete, brick, marble, stone, wood, glass, aluminum, steel, PVC and tile.

Use For: Repairing broken concrete • Bonding retaining wall block and caps

Polymeric Sand - Polymeric Sand is a precise mixture of polymer binders and clean natural sand. Polymeric Sand will bond with the pavers/stones adding strength to the joint as well as reliability to the pavement system. It is ideal for use on any paver surface such as sloping areas, driveways, patios, pool decks, sidewalks, etc.

Use For: Driveways • Sidewalks • Pool decks • Patios

BEFORE - No Sealer

AFTER - With Sealer

Color Variations

As in all natural materials, color in paving stones and wall stones has inherent variations. Paver and wall color is affected by the variances in the raw materials, concrete mixture, moisture content, climactic conditions, and other variations. Therefore, the colors shown are approximate representations of paver and wall colors, but should not be expected to be an exact match of what will be delivered.

The Nature of Efflorescence

Another cause of color variation in paving stones and wall stones may be the natural phenomenon called efflorescence. Efflorescence, a deposit of white salts consisting of mostly calcium carbonate, may appear as a white powder on the paver or wall surface and in no way affects the structural integrity. This phenomenon occurs in all concrete and although it cannot be completely prevented from occurring, efflorescence generally will weather off and disappear over time or can be removed with cleaners at the job site.

QUIKRETE and its subsidiaries (collectively QUIKRETE) reserve the right to improve its products and make changes to its specification and design without notice. The information contained herein has been compiled by QUIKRETE and to the best of its knowledge, accurately represents Keystone Hardscapes products and how it may be used in the applications which are illustrated. Site conditions, including load pressures acting on the wall, soil types and drainage conditions, may vary. Final determination of the suitability of the product for the use contemplated and the manner of product use are the sole responsibility of the user. Good construction practices and local building codes require the use of an engineered design when constructing retaining walls or freestanding walls in many conditions. Structural design and analysis should be provided by a qualified engineer.
